

# STD CLINICAL UPDATE

October 11, 2018

San Diego, CA

## LEARNING OBJECTIVES

- Describe local STD epidemiology and the role of the public health department in STD control activities, to better incorporate local data and resources in management of STD.
- Describe current epidemiology of congenital syphilis and syphilis among women in the United States, to better incorporate local data and resources in management of syphilis.
- Discuss syphilis screening recommendations for pregnant women, to ensure appropriate screening is implemented.
- Describe clinical manifestations, diagnostic approach, staging, and management of congenital syphilis and syphilis during pregnancy, to ensure infections are diagnosed and treated.
