

STD CLINICAL UPDATE

Thursday, October 13, 2016

8:00am - 12:30pm

Orange County, CA

Learning Objectives

At the completion of this activity, the participant will be able to:

- Describe local STD epidemiology and the role of the public health department in STD control activities.
- Summarize current screening recommendations for chlamydia and gonorrhea to ensure infections are diagnosed and treated.
- Summarize issues related to the development of antibiotic resistance in *Neisseria gonorrhoeae*, to ensure appropriate treatment and follow-up testing.
- Describe clinical manifestations, screening recommendations, diagnostic approach, staging, and management of syphilis.
- Be familiar with recent data on PrEP uptake by race, age, and sex.
- Be familiar with current data on PrEP effectiveness, and monitoring for HIV infection, STIs, and renal function.
- Understand current range of PrEP delivery models.
